

White Paper for Blowed Pepe (\$BPT)

1. Abstract

Blowed Pepe (\$BPT) is a decentralized, community-driven cryptocurrency inspired by the iconic Pepe the Frog meme. This token aims to harness the power of meme culture for entertainment, social engagement, and speculative investment. Blowed Pepe does not purport to have intrinsic value but rather exists to foster a vibrant community around meme sharing, creation, and celebration.

2. Introduction

Vision: To create a fun, meme-centric ecosystem where users can trade, engage, and celebrate the Pepe the Frog meme in a new, blockchain-based context.

Mission: To entertain, unite, and engage meme enthusiasts worldwide while exploring the potential of decentralized finance in the realm of digital culture.

3. Token Details

Token Name: Blowed Pepe

Symbol: BPEPE

Type: ERC-20 token on the Ethereum blockchain

Total Supply: 420,000,000,000,000 Blowed Pepe (a number chosen to resonate with meme culture)

Decimals: 18

4. Tokenomics

Distribution:

90% Liquidity: Added to decentralized exchange liquidity pools with LP tokens locked or burnt to prevent rug pulls.

10% Development and Marketing: Held in a multi-signature wallet for future listings, marketing campaigns, and community events.

No Transaction Tax: To ensure maximum accessibility and fun for all participants.

5. Utility and Use Cases

Community Building: Blowed Pepe acts as a token of appreciation within the Pepe community, used for tipping, rewards, or voting on community decisions.

Meme Contests: Organize and fund meme creation contests where Blowed Pepe can be used as both entry and prize.

Staking (Future Consideration): Explore staking mechanisms to reward long-term holders, enhancing community loyalty and token utility.

6. Technology

Blockchain: Ethereum, chosen for its security, wide adoption, and compatibility with DeFi ecosystems.

Smart Contracts: All Blowed Pepe operations are governed by transparent, audited smart contracts, ensuring trustless execution of token rules.

7. Roadmap

Launch Phase:

Deployment of initial token supply to liquidity pools.

Community building through social media and meme platforms.

Growth Phase:

Listings on additional decentralized and possibly centralized exchanges.

Partnerships with influencers and meme creators.

Expansion Phase:

Development of a dedicated platform or app for meme trading, voting, and creation.

Exploration of DeFi integrations like staking or yield farming.

8. Governance

Decentralized Governance: Empower the community with decision-making power regarding the token's future, including potential changes to tokenomics or new feature proposals.

9. Legal and Compliance

Disclaimer: Blowed Pepe is purely for entertainment; it does not constitute an investment. There's no expectation of profit from holding or trading \$BPT.

Intellectual Property: While inspired by Pepe the Frog, there's no official endorsement or legal relationship with Matt Furie or the comic. All uses are fan-based and for entertainment.

10. Team

Privacy: The team operates under pseudonyms, focusing on community governance over individual recognition.

Expertise: A mix of blockchain enthusiasts, meme culture aficionados, and developers dedicated to the project's success.

11. Conclusion

Blowed Pepe represents a playful yet ambitious venture into how blockchain can meet internet culture. By fostering a community around one of the most iconic memes, \$BPT aims to bring joy, creativity, and a new form of digital interaction to the crypto space.
